DETAILED ACTION

The indicated allowability of claims 4, 6 8-10, 12 and 17-19, 20 and 21 is withdrawn in view of the newly discovered references to Baustad, U.S. 6,915,686. Rejections based on the newly cited reference(s) follow.

Election/Restrictions

Claims 46-62 were withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species II, there being no allowable generic or linking claim. Applicant timely traversed the withdrawal of claims 46-62 in the reply filed on 3 February 2006.

The traversal is on the grounds that paragraphs [0053], [0054], [0058] and 0080 to [0082] describe methods for monitoring drilling with reference to Species I. This is not found persuasive because the drilling methods described include a permanently set casing string, and Species I does not include the method of drilling. The withdrawal is still deemed proper and is therefore made FINAL.

Newly submitted claim 64 and amended claim 23, 24, 26, 27 and 29-33 are directed to an invention that is independent or distinct from the invention originally selected for examination for the reasons stated above. Accordingly, claims 64 and amended claim 23, 24, 26, 27 and 29-33 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-10, 12, 13, 17, 19 and 20 rejected under 35 U.S.C. 102(e) as being anticipated by Baustad, U.S. 6,915,686.

Regarding claim 1-4, 6-10, 12, 13, 17, 19 and 20, Baustad discloses a casing string (35;210) located in a wellbore indefinitely having an optical sensor (10) within a carrier or pocket (216) firmly held about an inner surface recess (211) on outer surface (218; col. 5, lines 28-30) by a weld in the vicinity of a threaded sub connector.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 14, 17 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gysling et al., U.S. 6,354,147.

Regarding claims 1, 8, 14, 17 and 21, Gysling et al. discloses all the claimed limitations including the casing (502), wall mounted (col. 15, lines 60-65) sensors (14, 16, 18) and carrier (410).

Allowable Subject Matter

Claims 11 and 18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1, 3, 5, 7, 13 and 14 have been considered but are moot in view of the new grounds of rejection.
